II. HAZARD(S) IDENTIFICATION

Classification of the chemical in accordance with paragraph (d) of §1910.1200; GHS Hazard Symbols:			
GHS Classification:	Skin Corrosion/Irritation Category 2; Serious Eye Damage/Eye Irritation Category 2A; Hazardous to the aquatic environment - Acute Category 2; Hazardous to the aquatic environment - Chronic Category 2; Flammable Liquid Category 4		
GHS Signal Word:	Warning		
GHS Hazard	Cumbustible Liquid; Causes skin irritation.; May cause an allergic skin reaction.; Causes serious eye irritation.; Toxic to aquatic life; Toxic to aquatic life with long lasting effects.		
GHS Precautions:			
Safety Precautions:	Keep away from heat/sparks/open flames/hot surfaces. – No smoking. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.		
First Aid Measures (Response):	IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Specific treatment (see on this label). If skin irritation occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. In case of fire: Use extinguishing media listed in Section 5 of the SDS to extinguish. Collect spillage.		
AZALEA	Page 1 of 9		

Storage:Store in a well-ventilated place. Keep cool.Disposal:Dispose of contents/container in accordance with local/regional/national/international regulation for
hazardous wastes.

III. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS #	%	
4,7-Methano-1H-inden-6-ol, 3a,4,5,6,7,7a-hexahydro-, 6-	17511-60-3	10 - 30	
propanoate			
7-Octen-2-ol, 2,6-dimethyl-	18479-58-8	10 - 30	
2-Phenylethanol	60-12-8	3 - 7	
1,6-Octadien-3-ol, 3,7-dimethyl-	78-70-6	3 - 7	
1,6-Octadien-3-ol, 3,7-dimethyl-, 3-acetate	115-95-7	3 - 7	
1,3-Benzodioxole-5-carboxaldehyde	120-57-0	1 - 5	
Oils, grapefruit	8016-20-4	0.5 - 1.5	
2,6-Octadien-1-ol, 3,7-dimethyl-, (2E)-	106-24-1	0.1 - 1	
6-Octen-1-ol, 3,7-dimethyl-	106-22-9	0.1 - 1	
2-Nonynoic acid, methyl ester	111-80-8	0.1 - 1	
3-Cyclohexene-1-carboxaldehyde, 2,4-dimethyl-	68039-49-6	0.1 - 1	

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret is required.

IV. FIRST-AID MEASURES

Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen.
Eyes:	Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Get medical attention if irritation develops or persists.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.

symptoms and effects - acute	No Data Available
Most important	
symptoms and effects - chronic	No Data Available
Notes to Doctor:	No additional first aid information available
V. FIRE FIGHTING MEASURE	S
Flammability Summary:	Combustible

<u>Flammability Summary:</u>	Combustible
Extinguishing Media:	Use alcohol resistant foam, carbon dioxide, dry chemical, or water
	spray when fighting fires. Water or foam may cause frothing if liquid

Revision Date: 06-02-20 is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. Extinguishing Media advised against: Fire and/or Explosion Hazards: No Data Available Fire and/or Explosion Hazards: Material may be ignited if preheated to temperatures above the flash point in the presence of a source of ignition. Combustible Liquid. Can form explosive mixtures at temperatures at or above the flash point. Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be dangerous. Do not pressurize, cut, weld, traze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire. Hazardous Combustion Products: Carbon Oxides, Carbon dioxide, Carbon monoxide VI. ACCIDENTAL RELEASE MEASURES Personal Precautions and Equipment: No special split clean-up considerations. Collect and discard in regular trash. VII. HANDLING AND STORAGE Handling Technical Measures and Conditions: Storage Technical Measures and Co		Survey Butte Sheet

Engineering Measures:	No exposure limits exist for the constituents of this product. General room ventilation
	might be required to maintain operator comfort under normal conditions of use.
	Engineering controls must be designed to meet the OSHA chemical specific standard
	in 29 CFR 1910. Engineering controls must be designed to control vapor
	concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or
	using this material should be equipped with an eyewash and safety shower.

AZALEA

Revision Date: 06-02-20

Respiratory Protection:	No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required.
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield
Gloves:	No information available
Handling Instructions:	As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.

Hazardous Decomposi	tion Products:	Carbon Oxides Carbon dioxide Carbon monoxide	
XI. TOXICOLOGICAL INF	ORMATION		
Routes of Entry: Most Important Symptoms:	Skin contact, Eye contact No Data Available		
Chemical Interactions	That Change Toxicity:	No chemical interaction known to affect toxicity.	
Immediate (Acute) Healt	h Effects by Route of Expos	sure:	
Inhalation Irritation:		spiratory irritation.	
Skin Contact:		inor skin irritation.	
Skin Absorption:		No absorption hazard in normal industrial use.	
Eye Contact: Ingestion Irritation:	result in tear Temporary v Irritating to r vomiting and pneumonitis	Contact with the eyes may cause moderate to severe eye injury. Eye contact may result in tearing and reddening, but not likely to permanently injure eye tissue. Temporary vision impairment (cloudy or blurred vision) is possible. Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis.	
Ingestion Toxicity:	Harmful if sv	Harmful if swallowed.	
Long-Term (Chronic)	Health Effects:		
Carcinogenicity:		substances have been shown to cause cancer in long term animal	
Reproductive toxicity	: No data avai 0.1% may ca	a carcinogen according to NTP, IARC, or OSHA. lable to indicate product or any components present at greater than use birth defects. Possible reproductive hazard.	
Germ cell mutagenici	-	lable to indicate product or any components present at greater than genic or genotoxic.	
Inhalation:	Upon prolon	ged and/or repeated exposure, can cause minor respiratory irritation, eakness, fatigue, nausea, and headache.	
Skin Contact:		ged or repeated contact, can cause minor skin irritation, defatting, and	
Skin Absorption:		ged or repeated exposure, no hazard in normal industrial use.

XIII. DISPOSAL CONSIDERATIONS

Waste Description for Spent Product: Waste Description for Empty Packaging:	Spent or discarded material may be a hazardous waste. No Data Available
Disposal Methods:	DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the sole responsibility of the waste generator. As your supplier, we have no control over the management practices or manufacturing processes of parties handling or using this material. The information presented here pertains only to the product when used as intended, according to this MSDS. For unused and uncontaminated product, the preferred options include sending to a licensed and permitted incinerator or other thermal destruction device. Various federal, state or provincial agencies may have specific regulations concerning the transportation, handling, storage, use or disposal of this product which may not be covered in this MSDS. The user shall have to review these regulations to ensure full compliance with all applicable regulations.

XIV. TRANSPORTATION INFORMATION

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret is required.

IV. FIRST-AID MEASURES

Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately
Eyes:	Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Remove contaminated clothing and launder. Get medical attention if irritation develops or persists.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.

If protection including self- ull protective equipment. Fight sted location due to the acomposition products. Use
VI. ACCIDENTAL RELEASE MEAS	JRES	
Personal Precautions and Equ		
Methods for Clean-up:	contact can be avoided. Follow person recommendations found in Section VI No special spill clean-up consideration trash.	II of this MSDS
VII. HANDLING AND STORAGE		
Handling Technical Measures	with all chemicals, good indus be followed when handling th material, avoid breathing dus ventilated area. Do not get in	id unnecessary exposure. As strial hygiene practices should his material. Avoid contact with ts or fumes, use only in a well eyes, on skin and clothing Use npty" containers retain product and can be dangerous. Wash Page 3 of 7

 Revision Date: 09-11-20

 Storage Technical Measures and Conditions:
 Store in a cool dry place. Isolate from incompatible materials. Limit quantity of material stored. Store in a tightly closed container Store in a cool dry place Keep away from heat, sparks, and flame Store in a cool place in original container and protect from sunlight Keep container closed when not in use Keep away from food and drinking water.

 Materials to Avoid/Chemical Incompatibility:
 Strong oxidizing agents Acids Bases Reducing agents Strong bases Acetic anhydride Chlorinated compounds Metals Caustics (bases) Strong reducing

agents

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Measures:	No exposure limits exist for the constituents of this product. Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Engineering controls must be designed to control vapor concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits	
Respiratory Protection:	Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required. Respiratory protection may be required in addition to ventilation depending upon conditions of use.	,
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield	
Skin Protection:	Wear protective gloves. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.	
Gloves: Handling Instructions:	No information available As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Wash thoroughly after handling

XIII. DISPOSAL CONSIDERATIONS

Revision Date: 09-11-20

Waste Description for Spent Product: Waste Description for Empty Packaging:

Disposal Methods:

Spent or discarded material is not expected to be a hazardous waste.

No Data Available

DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the sole responsibility of the waste generator. As your supplier, we have no control over the management practices or manufacturing processes of parties handling or using this material. The information presented here pertains only to the product when used as intended, according to this MSDS. For unused and uncontaminated product, the preferred options include sending to a licensed and permitted incinerator or other thermal destruction device. Various federal, state or provincial agencies may have specific regulations concerning the transportation, handling, storage, use or disposal of this product which may not be covered in this MSDS. The user shall have to review these regulations to ensure full compliance with all applicable regulations.

5. Fire-fighting measures	

Suitable (and unsuitable) extinguishing media:

Suitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.
Unsuitable extinguishing media:	No Data Available
Specific hazards arising from the c	hemical (e.g., nature of any hazardous combustion products):
Flammability Summary:	Combustible
Fire and/or Explosion Hazards:	Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back.
Hazardous Combustion Products:	Carbon Oxides, Carbon dioxide, Carbon monoxide
Special protective equipment and precautions for fire- fighters:	Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products.

Product Name: FREESIA Product identifier: FRFRE Revision Date: 04-07-2021 Replaces:

6. Accidental release measures		
Personal precautions, protective equipment, and emergency procedures: Methods and materials for containment and cleaning up:	No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.	
7. Handling and storage		
Precautions for safe handling:	Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.	
Conditions for safe storage, including any incompatibilities		
Conditions for safe storage:	Store in a cool dry place. Isolate from incompatible materials. Limit quantity of material stored. Store in a tightly closed container Store in a cool dry place Keep away from heat, sparks, and flame	
Materials to Avoid/Chemical Incompatibility:	Strong oxidizing agents Acids Bases Reducing agents	

8. Exposure controls/personal protection

OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available:

Chemical Component	ACGIH TLV-TWA	ACGIH STEL	OSHA PEL
No Data Available			
Appropriate engineering controls:	No exposure limits exist for the constituents of this product. General room ventilation might be required to maintain operator comfort under normal conditions of use. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Engineering controls must be designed to control vapor concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower.		
Individual protection measure	s, such as personal protective	e equipment:	
Respiratory Protection:	No respiratory protection required under normal conditions of use.

2. Hazard(s) identification

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

GHS Hazard Symbols:

GHS Classification:

GHS Signal Word: GHS Hazard Statements:

GHS Precautionary Statements: Safety Precautions: Hazardous to the aquatic environment - Acute Category 2; Hazardous to the aquatic environment - Chronic Category 2 Warning May cause an allergic skin reaction.; Causes serious eye irritation.; Suspected of damaging fertility or the unborn child.; Toxic to aquatic life..; Toxic to aquatic life with long lasting effects.

Serious Eye Damage/Eye Irritation Category 2A; Reproductive Toxicity Category 2;

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Avoid release to the

environment. Wear protective gloves/protective clothing/eye protection/face protection.
IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Wash contaminated clothing before reuse. Collect spillage.
Store locked up.
Dispose of contents/container in accordance with local/regional/national/international regulation for hazardous wastes.

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:

Product Name: GARDENIA

Product identifier: FRGAR Revision Date: 04-07-2021

Replaces:

Eye Contact:	Immediately flush eyes with plenty of water for at least 20 minutes	
	retracting eyelids often. Tilt the head to prevent chemical from	
	transferring to the uncontaminated eye. Get immediate medical	
	attention and monitor the eye daily as advised by your physician.	
Skin Contact:	Wash with soap and water. Get medical attention if irritation	
	develops or persists.	
Inhalation:	Remove to fresh air. If breathing is difficult, have a trained	
	individual administer oxygen.	
Ingestion:	Do not induce vomiting and seek medical attention immediately.	
	Drink two glasses of water or milk to dilute. Provide medical care	
	provider with this MSDS. Induce vomiting as a last measure.	
	Induced vomiting may lead to aspiration of the material into the	
	lungs potentially causing chemical pneumonitis.	
Most important symptoms/effects, acute and delayed:		
Most important	No Data Available	
symptoms/effects (Acute):		
Most important	No Data Available	
symptoms/effects (Delayed):		
Indication of immediate	No additional first aid information available	
medical attention and special		
treatment needed, if necessary:		

5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media:		
Suitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.	
Unsuitable extinguishing media:	No Data Available	
Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products):		
Flammability Summary:	Combustible at elevated temperatures	
Fire and/or Explosion	Material may be ignited if preheated to temperatures above the	
Hazards:	flash point in the presence of a source of ignition.	
Hazardous Combustion	Carbon Oxides, Carbon dioxide, Carbon monoxide, nitrogen oxides	
Products:	(NOx)	
Special protective equipment	Do not enter fire area without proper protection including self-	
and precautions for fire-	contained breathing apparatus and full protective equipment. Fight	
fighters:	fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products.	

Product Name: GARDENIA

Product identifier: FRGAR **Revision Date:** 04-07-2021 **Replaces:**

6. Accidental release measures	
Personal precautions, protective equipment, and emergency procedures: Methods and materials for containment and cleaning up:	No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.
7. Handling and storage	
Precautions for safe handling:	Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.
Conditions for safe storage, inclu	ding any incompatibilities
Conditions for safe storage:	Store in a cool dry place. Isolate from incompatible materials. Limit quantity of material stored. Store in a tightly closed container Store in a cool dry place Keep away from heat, sparks, and flame
Materials to Avoid/Chemical Incompatibility:	Strong oxidizing agents Acids Bases Reducing agents Strong bases Strong acids

8. Exposure controls/personal protection

OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available:

Chemical Component	ACGIH TLV-TWA	ACGIH STEL	OSHA PEL
No Data Available			
Appropriate engineering controls:	No exposure limits exist for the constituents of this product. General room ventilation might be required to maintain operator comfort under normal conditions of use. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Engineering controls must be designed to control vapor concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower.		
Individual protection measures, su	ich as personal protective e	quipment:	
Respiratory Protection:	No respiratory protection	required under norma	l conditions of use.
GARDENIA]	Page 5 of 11

Product Name: GARDENIA Product identifier: FRGAR Revision Date: 04-07-2021 Replaces:

	Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not
	normally required. Follow a respiratory protection program that
	meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever
	work place conditions warrant the use of a respirator. A supplied air
	type respiratory will be required.
Eye Protection:	Wear chemically resistant safety glasses with side shields when
	handling this product. Wear additional eye protection such as
	chemical splash goggles and/or face shield when the possibility
	exists for eye contact with splashing or spraying liquid, or airborne
	material. Do not wear contact lenses. Have an eye wash station
	available. Wear goggles and a Face shield
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin
	contact, practice good personal hygiene and wear a barrier cream
	and/or impervious surgical style gloves. Wash hands and other
	exposed areas with mild soap and water before eating, drinking,
	and when leaving work. Where contact is likely, wear chemical
	resistant gloves, a chemical suit, rubber boots, and chemical safety
	goggles plus a face shield
Gloves:	No information available
Respiratory Protection:	No respiratory protection required under normal conditions of use.
	Provide general room exhaust ventilation if symptoms of
	overexposure occur as explained Section III. A respirator is not
	normally required. Follow a respiratory protection program that
	meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever
	work place conditions warrant the use of a respirator. A supplied air
Other Ducto stine Family and	type respiratory will be required.
Other Protective Equipment:	Wear goggles and a Face shield Where contact is likely, wear
	chemical resistant gloves, a chemical suit, rubber boots, and
Concret Ungione Conditioner	chemical safety goggles plus a face shield
General Hygiene Conditions:	As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material,
	avoid breathing dusts or fumes, use only in a well ventilated area.
	Do not get in eyes, on skin and clothing Use with adequate
	ventilation "Empty" containers retain product residue (liquid and/or
	vapor) and can be dangerous.

Chemical Interactions That None Known Change Toxicity:

Delayed and immediate effects and also chronic effects from short- and long-term exposure:

Immediate (Acute) Health Effects by Route of Exposure:

Inhalation Irritation:	Can cause respiratory irritation.
Skin Contact:	Can cause minor skin irritation.
:	No absorption hazard in normal industrial use.
Eye Contact:	Contact with the eyes may cause moderate to severe eye injury. Eye contact may result in tearing and reddening, but not likely to permanently injure eye tissue. Temporary vision impairment (cloudy or blurred vision) is possible.
Ingestion Irritation:	Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis.
Ingestion Toxicity:	Harmful if swallowed.

Long-Term (Chronic) Health Effects:

Carcinogenicity:	None of the substances have been shown to cause cancer in long term animal studies. Not a carcinogen according to NTP, IARC, or OSHA.
Reproductive and	No data available to indicate product or any components present at greater than
Developmental Toxicity:	0.1% may cause birth defects. Possible reproductive hazard.
Mutagenicity:	No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.
Inhalation:	Upon prolonged and/or repeated exposure, can cause minor respiratory irritation, dizziness, weakness, fatigue, nausea, and headache.
Skin Contact:	Upon prolonged or repeated contact, can cause minor skin irritation, defatting, and dermatitis.
Skin Absorption:	Upon prolonged or repeated exposure, no hazard in normal industrial use.

Description of waste residues and information on their safe handling and methods of disposal, including the disposal of any contaminated packaging

Description of waste residues:	Spent or discarded material is not expected to be a hazardous waste.
Safe Handling of Waste:	No Data Available
Waste treatment methods (including packaging):	DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the sole responsibility of the waste generator. As your supplier, we have no control over the management practices or manufacturing processes of parties handling or using this material. The information presented here pertains only to the product when used as intended, according to this MSDS. For unused and uncontaminated product, the preferred options include sending to a licensed and permitted incinerator or other thermal destruction device. Various federal, state or provincial agencies may have specific regulations concerning the transportation, handling, storage, use or disposal of this product which may not be covered in this MSDS. The user shall have to review these regulations to ensure full compliance with all applicable regulations.

II. HAZARD(S) IDENTIFICATION

Classification of the chemical in accordance with paragraph (d) of §1910.1200; GHS Hazard Symbols:	
GHS Classification: Skin Corrosion/Irritation Category 2; Serious Eye Damage/Eye Irritation Category 2A; Reproductive Toxicity Category 2; Hazardous to the aquatic environment - Acute Category 2; Hazardous to the aquatic	atic
GHS Signal Word: Warning	
GHS Hazard Causes skin irritation.; May cause an allergic skin reaction.; Causes serious eye irritation.; Suspected c damaging fertility or the unborn child.; Toxic to aquatic life; Harmful to aquatic life with long lasting effects.	
GHS Precautions:	
Safety Precautions: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Contaminated work clothing should not be allowed out the workplace. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. Use personal protective equipment as required.	
First Aid Measures (Response):IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned Get medical advice/attention. Specific treatment (see on this label). If skin irritation occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. If eye irritation

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

No exposure limits exist for the constituents of this product. General room ventilation **Engineering Measures:** might be required to maintain operator comfort under normal conditions of use. WOODBINE

Page 3 of 10

Revision Date: 06-02-20

	Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Engineering controls must be designed to control vapor concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower.
Respiratory Protection:	No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required.
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield
Gloves:	No information available
Handling Instructions:	As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.

XI. TOXICOLOGICAL INFORMATION

Routes of Entry: Most Important	Skin contact, Eye contact No Data Available	
Symptoms: Chemical Interactions	S That Change Toxicity:	No chemical interaction known to affect toxicity.

Immediate (Acute) Health Effects by Route of Exposure:

Inhalation Irritation:	Can cause respiratory irritation.
Skin Contact:	Can cause minor skin irritation.
Skin Absorption:	No absorption hazard in normal industrial use.
Eye Contact:	Contact with the eyes may cause moderate to severe eye injury. Eye contact may result in tearing and reddening, but not likely to permanently injure eye tissue. Temporary vision impairment (cloudy or blurred vision) is possible.
Ingestion Irritation:	Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis.
Ingestion Toxicity:	Harmful if swallowed.

Long-Term (Chronic) Health Effects:

Carcinogenicity:	None of the substances have been shown to cause cancer in long term animal
	studies. Not a carcinogen according to NTP, IARC, or OSHA.
Reproductive toxicity:	No data available to indicate product or any components present at greater than
Corm coll mutagonicity	0.1% may cause birth defects. Possible reproductive hazard.
Germ cell mutagenicity:	No data available to indicate product or any components present at greater than
Inhalation:	0.1% is mutagenic or genotoxic.
Skin Contact: WOODBINE	Upon prolonged and/or repeated exposure, can cause minor respiratory irritation, dizziness, weakness, fatigue, nausea, and headache. Upon prolonged or repeated contact, can cause minor skin irritation, defatting, and

dermatitis.

Revision Date: 06-02-20

Skin Absorption:

Upon prolonged or repeated exposure, no hazard in normal industrial use.

XIII. DISPOSAL CONSIDERATIONS

Waste Description for Spent Product: Waste Description for Empty Packaging:	Spent or discarded material is not expected to be a hazardous waste. No Data Available
Disposal Methods:	DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the sole responsibility of the waste generator. As your supplier, we have no control over the management practices or manufacturing processes of parties handling or using this material. The information presented here pertains only to the product when used as intended, according to this MSDS. For unused and uncontaminated product, the preferred options include sending to a licensed and permitted incinerator or other thermal destruction device. Various federal, state or provincial agencies may have specific regulations concerning the transportation, handling, storage, use or disposal of this product which may not be covered in this MSDS. The user shall have to review these regulations to ensure full compliance with all applicable regulations.

XVI. OTHER INFORMATION

Revision Date: 06-02-2020 Disclaimer:

Important: While the descriptions, data and information contained herein are presented in good faith and believed to be accurate, it is provided for your guidance only. Because many factors may affect processing or application/use, we recommend that you perform an assessment to determine the suitability of the product for your particular purpose prior to use. Nothing herein should be interpreted as a recommendation to infringe existing patents or violate any laws or regulations. No warranties of any kind, either expressed or implied, including fitness for a particular purpose are made regarding the product described. We assume NO responsibility for any injuries resulting from misuse or misapplication of this product or that might be sustained because of inhalation, ingestion, absorption or other contact with this product. In no case shall the descriptions, information, or data provided be considered a part of our terms and conditions of sale. Further, the descriptions, data and information furnished hereunder are given gratis. No obligation or liability for the description, data and information given are assumed. All such being given and accepted at your risk.

2. Hazard(s) identification

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

GHS Classification:	Hazardous to the aquatic environment - Acute Category 1; Skin
	Corrosion/Irritation Category 2; Serious Eye Damage/Eye Irritation Category 2A;
	Reproductive Toxicity Category 2; Hazardous to the aquatic environment - Chronic
	Category 2; Acute Toxicity - Oral Category 4
GHS Signal Word:	Warning
GHS Hazard Statements:	Harmful if swallowed.; Causes skin irritation.; May cause an allergic skin reaction.; Causes serious eye irritation.; Suspected of damaging fertility or the unborn child.; Very toxic to aquatic life.; Toxic to aquatic life with long lasting effects.
GHS Precautionary Statements:	
Safety Precautions:	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Do no eat, drink

Product Name: JASMINE Product identifier: FRJAS Revision Date: 04-07-2021 Replaces:

	or smoke when using this product. Contaminated work clothing should not be
	allowed out of the workplace. Avoid release to the environment. Wear protective
	gloves/protective clothing/eye protection/face protection.
First Aid Measures:	IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. IF
	ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with
	water for several minutes. Remove contact lenses, if present and easy to do.
	Continue rinsing. IF exposed or concerned: Get medical advice/attention. Rinse
	mouth. If skin irritation occurs: Get medical advice/attention. If skin irritation or
	rash occurs: Get medical advice/attention. If eye irritation persists: Get medical
	advice/attention. Take off contaminated clothing and wash before reuse. Wash
	contaminated clothing before reuse. Collect spillage.
Storage:	Store locked up.
Disposal:	Dispose of contents/container in accordance with
	local/regional/national/international regulation for hazardous wastes.

trade secret.

4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:

Eye Contact:	Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Get medical attention if irritation develops or persists.
Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.
Mast important supertants/offact	to pouto and delayed.

Most important symptoms/effects, acute and delayed:

Most important symptoms/effects (Acute): Most important symptoms/effects (Delayed):	No Data Available No Data Available
Indication of immediate medical attention and special treatment needed, if necessary:	No additional first aid information available

5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media:

Suitable extinguishing media: Unsuitable extinguishing media: Specific hazards arising from the c	Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. No Data Available hemical (e.g., nature of any hazardous combustion products):
Flammability Summary: Fire and/or Explosion Hazards:	Combustible at elevated temperatures Material may be ignited if preheated to temperatures above the flash point in the presence of a source of ignition. Combustible Liquid. Can form explosive mixtures at temperatures at or above

Product Name: JASMINE Product identifier: FRJAS Revision Date: 04-07-2021 Replaces:

 the flash point. Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Carbon Oxides, Carbon dioxide, Carbon monoxide Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire.
No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.
Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.
ding any incompatibilities
Store in a cool dry place. Isolate from incompatible materials. Limit quantity of material stored. Store in a tightly closed container Store in a cool dry place Keep away from heat, sparks, and flame Strong oxidizing agents Acids Bases Reducing agents Strong bases Strong acids

Product Name: JASMINE
Product identifier: FRJAS
Revision Date: 04-07-2021
Replaces:

8. Exposure controls/personal protection

OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available:

Chemical Component	ACGIH TLV-TWA	ACGIH STEL	OSHA PEL	
No Data Available				
Appropriate engineering controls:	No exposure limits exist for the constituents of this product. General room ventilation might be required to maintain operator comfort under normal conditions of use. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Engineering controls must be designed to control vapor concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower.			
Individual protection measure	s, such as personal protectiv	<i>v</i> e equipment:		
Respiratory Protection:	No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required.			
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield			
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield			
Gloves:	No information available			
Respiratory Protection:	No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever			
JASMINE			Page 5 of 10	

	work place conditions warrant the use of a respirator. A supplied air type respiratory will be required.	
Other Protective Equipment:	Wear goggles and a Face shield Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield	
General Hygiene Conditions:	As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.	

9. Physical and chemical properties

Appearance (physical state, color, etc.):			
Appearance (physical state):	Liquid		
Color:	Clear		
Odor:	Comparable to Standard		
Odor threshold:	Not determined		
pH:	Not Available		
Melting Point/Freezing Point (°C):	63 - 68 º F		
Initial Boiling Point and Boiling Range (°C):	220		
Flash Point :	> 200 º F		
Evaporation Rate:	Not Available		
Flammability (solid, gas):	No Data Available		
Upper/lower flammability or explosive limits:			
Upper Flammable/Explosive Limit:	Not Available		
Lower Flammable/Explosive Limit:	Not Available		
Vapor Density:	> 1		
Relative Density:	1.0232		
Solubility(ies):	Soluble in water- No		
Auto-ignition Temperature (°C):	481 º C		
Decomposition Temperature::	324		
Viscosity:	No Data Available		
Volatiles, % by weight	7.92		
Volatile Organic Chemicals	No Data Available		
Bulk Density	8.537		

10. Stability and reactivity

Reactivity: Chemical stability: Possibility of hazardous reactions: No Data Available Stable under normal conditions. No Data Available

JASMINE

Product Name: JASMINE Product identifier: FRJAS

Revision Date: 04-07-2021

Conditions to avoid (e.g., static discharge, shock, or vibration):	Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Contamination Elevated temperatures Heat flame
	sparks Extremes of temperature direct sunlight.
Incompatible materials:	Strong oxidizing agents Acids Bases Reducing agents Strong bases Strong acids
Hazardous decomposition products:	Carbon Oxides Carbon dioxide Carbon monoxide

11. Toxicological information

Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact):	Skin contact, Eye contact
Symptoms related to the physical, chemical and	No Data Available
toxicological characteristics: Target Organs Potentially	No Data Available
Affected by Exposure:	
Chemical Interactions That	No chemical interaction known to affect toxicity.
Change Toxicity:	

Delayed and immediate effects and also chronic effects from short- and long-term exposure:

Immediate (Acute) Health Effects by Route of Exposure:

Inhalation Irritation:	Can cause respiratory irritation.
Skin Contact:	Can cause minor skin irritation.
:	No absorption hazard in normal industrial use.
Eye Contact:	Contact with the eyes may cause moderate to severe eye injury. Eye contact may result in tearing and reddening, but not likely to permanently injure eye tissue.
Ingestion Irritation:	Temporary vision impairment (cloudy or blurred vision) is possible. Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis.
Ingestion Toxicity:	Harmful if swallowed.

Long-Term (Chronic) Health Effects:

Carcinogenicity:	None of the substances have been shown to cause cancer in long term animal		
	studies. Not a carcinogen according to NTP, IARC, or OSHA.		
Reproductive and	No data available to indicate product or any components present at greater than		
Developmental Toxicity:	0.1% may cause birth defects. Possible reproductive hazard.		
Mutagenicity:	No data available to indicate product or any components present at greater than		
	0.1% is mutagenic or genotoxic.		
Inhalation:	Upon prolonged and/or repeated exposure, can cause minor respiratory irritation,

IV. FIRST-AID MEASURES

Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately
Eyes:	Flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention.
Skin Contact:	Wash with soap and water. Remove contaminated clothing and launder. Get medical attention if irritation develops or persists.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS.

Revision Date: 09-11-20

Revision Date: 09-11-20 symptoms and effects -No Data Available chronic Notes to Doctor: No additional first aid information available **V. FIRE FIGHTING MEASURES** Flammability Summary: Combustible at elevated temperatures Extinguishing Media: Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. Extinguishing Media advised against: No Data Available Fire and/or Explosion Hazards: Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back. Fire Fighting Methods and Protection: Do not enter fire area without proper protection including selfcontained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire. Hazardous Combustion Products: Carbon Oxides, Carbon dioxide, Carbon monoxide, Toxic fumes., Toxic gases **VI. ACCIDENTAL RELEASE MEASURES Personal Precautions and Equipment:** No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular Methods for Clean-up: trash. VII. HANDLING AND STORAGE Handling Technical Measures and Precautions: Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Wash thoroughly after handling Do not get in eyes, on skin and clothing Use spark-proof tools and explosion-proof equipment Ground and bond containers when transferring material "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. **Storage Technical Measures and Conditions:** Store in a cool dry place. Isolate from incompatible materials. Store in a cool place in original container and protect from sunlight Keep container closed when not in use Keep away from food and drinking water. Keep away from heat, sparks, and flame Do not store near combustible materials Strong oxidizing agents Acids Bases Reducing agents Acetic Materials to Avoid/Chemical Incompatibility: anhydride Chlorinated compounds Metals Caustics (bases) Page 3 of 7

Strong acids

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Measures:	No exposure limits exist for the constituents of this product. Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits Explosion proof exhaust ventilation should be used. Facilities storing or using this material should be equipped with an eyewash and safety shower.		
Respiratory Protection:	Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. Respiratory protection may be required in addition to ventilation depending upon conditions of use.		
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Do not wear contact lenses. Wear goggles and a Face shield		
Skin Protection:	Wear protective gloves. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.		
Gloves: Handling Instructions:	No information available As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Wash thoroughly after handling Do not get in eyes, on skin and clothing Use spark-proof tools and explosion-proof equipment Ground and bond containers when transferring material "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.

4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:

Eye Contact:	Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Remove contaminated clothing and launder. Get medical attention if irritation develops or persists.
Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.

Most important symptoms/effects, acute and delayed:

Most important symptoms/effects (Acute):	No Data Available
Most important symptoms/effects (Delayed):	No Data Available
Indication of immediate medical attention and special treatment needed, if necessary:	No additional first aid information available

5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media:

Suitable extinguishing media: Unsuitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. No Data Available
Specific hazards arising from the	chemical (e.g., nature of any hazardous combustion products):
Flammability Summary:	Combustible at elevated temperatures
Fire and/or Explosion Hazards:	Material may be ignited if preheated to temperatures above the flash point in the presence of a source of ignition. Combustible Liquid. Can form explosive mixtures at temperatures at or above

Product Name: LILAC Product identifier: FRLIL Revision Date: 04-07-2021 Replaces:

Replaces:	
Hazardous Combustion Products: Special protective equipment and precautions for fire- fighters:	the flash point. Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Carbon Oxides, Carbon dioxide, Carbon monoxide, Toxic fumes., Toxic gases Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire.
6. Accidental release measures	
Personal precautions, protective equipment, and emergency procedures: Methods and materials for containment and cleaning up:	No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.
7. Handling and storage	
Precautions for safe handling:	Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Wash thoroughly after handling

13. Disposal considerations

Description of waste residues and information on their safe handling and methods of disposal, including the disposal of any contaminated packaging **Description of waste residues:** Spent or discarded material is not expected to be a hazardous waste. Safe Handling of Waste: No Data Available Waste treatment methods DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO (including packaging): ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the sole responsibility of the waste generator. As your supplier, we have no control over the management practices or manufacturing processes of parties handling or using this material. The information presented here pertains only to the product when used as intended, according to this MSDS. For unused and uncontaminated product, the preferred options include sending to a licensed and permitted incinerator or other thermal destruction device. Various federal, state or provincial agencies may have specific regulations concerning the transportation, handling, storage, use or disposal of this product which may not be covered in this MSDS. The user shall have to review these regulations to ensure full compliance with all applicable regulations.

14. Transport information

II. HAZARD(S) IDENTIFICATION

Classification of the che GHS Hazard Symbols:	emical in accordance with paragraph (d) of §1910.1200;
GHS Classification:	Skin Corrosion/Irritation Category 2; Serious Eye Damage/Eye Irritation Category 2A; Reproductive Toxicity Category 2; Hazardous to the aquatic environment - Acute Category 2; Hazardous to the aquatic environment - Chronic Category 2
GHS Signal Word:	Warning
GHS Hazard	Causes skin irritation.; May cause an allergic skin reaction.; Causes serious eye irritation.; Suspected of damaging fertility or the unborn child.; Toxic to aquatic life; Toxic to aquatic life with long lasting effects.
GHS Precautions:	
Safety Precautions:	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. Use personal protective equipment as required.
First Aid Measures (Response):	IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention. Specific treatment (see on this label). If skin irritation occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash before reuse. Wash

III. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS #	%	
2-Phenylethanol	60-12-8	5 - 10	
Octanal, 2-(phenylmethylene)-	101-86-0	5 - 10	
Octanal, 7-hydroxy-3,7-dimethyl-	107-75-5	3 - 7	
1,6-Octadien-3-ol, 3,7-dimethyl-	78-70-6	1 - 5	
Acetic acid, phenylmethyl ester	140-11-4	1 - 5	
3-Cyclohexene-1-carboxaldehyde, 4-(4-hydroxy-4-methylpentyl)-	31906-04-4	1 - 5	
6-Octen-1-ol, 3,7-dimethyl-	106-22-9	1 - 5	
Benzenepropanal, 4-(1,1-dimethylethyl)alphamethyl-	80-54-6	1 - 5	
3-Cyclohexene-1-methanol, .alpha.,.alpha.,4-trimethyl-	98-55-5	1 - 5	
Cyclopenta[g]-2-benzopyran, 1,3,4,6,7,8-hexahydro-4,6,6,7,8,8-hexamethyl-	1222-05-5	1 - 5	
1,4-Dioxacycloheptadecane-5,17-dione	105-95-3	0.5 - 1.5	
Benzenepropanal, .alphamethyl-4-(1-methylethyl)-	103-95-7	0.1 - 1	
2,6-Octadien-1-ol, 3,7-dimethyl-, (2E)-	106-24-1	0.1 - 1	
2,6-Octadien-1-ol, 3,7-dimethyl-, 1-acetate, (2E)-	105-87-3	0.1 - 1	

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret is required.

IV. FIRST-AID MEASURES

Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer
Eyes:	oxygen. Immediately flush eyes with plenty of water for at least 20 minutes retracting
	eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Get medical attention if irritation develops or persists.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.
Most important symptoms and effects - acute	No Data Available
Most important symptoms and effects - chronic	No Data Available
Notes to Doctor:	No additional first aid information available

Revision Date: 06-02-20

V. FIRE FIGHTING MEASURES	Revision Date: 06-02-20
<u>Flammability Summary:</u> Extinguishing Media: Extinguishing Media advised against: Fire and/or Explosion Hazards:	Combustible at elevated temperatures Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. No Data Available Material may be ignited if preheated to temperatures above the flash point in the presence of a source of ignition. Combustible Liquid. Can form explosive mixtures at temperatures at or above the flash point. Empty containers that retain product residue (liquid, solid/sludge, or
Fire Fighting Methods and Protection: Hazardous Combustion Products:	vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire. Carbon Oxides, Carbon dioxide, Carbon monoxide
VI. ACCIDENTAL RELEASE MEASURES Personal Precautions and Equipment:	No health affects expected from the clean-up of this material if
Methods for Clean-up:	contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.
VII. HANDLING AND STORAGE	
Handling Technical Measures and Precau	tions: Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.
Storage Technical Measures and Conditio	
Materials to Avoid/Chemical Incompatibi	

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Measures: No exposure limits exist for the constituents of this product. General room ventilation

Revision Date: 06-02-20

	might be required to maintain operator comfort under normal conditions of use. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Engineering controls must be designed to control vapor concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower.
Respiratory Protection:	No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required.
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield
Gloves:	No information available
Handling Instructions:	As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.

6. Accidental release measures	
Personal precautions, protective equipment, and emergency procedures: Methods and materials for containment and cleaning up:	No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.
7. Handling and storage	
Precautions for safe handling:	Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Wash thoroughly after handling
Conditions for safe storage, inclu	ding any incompatibilities
Conditions for safe storage: Materials to Avoid/Chemical Incompatibility:	Store in a cool dry place. Isolate from incompatible materials. Limit quantity of material stored. Store in a tightly closed container Store in a cool dry place Keep away from heat, sparks, and flame Store in a cool place in original container and protect from sunlight Keep container closed when not in use Keep away from food and drinking water. Strong oxidizing agents Acid chlorides Acid anhydrides Strong acids Strong bases Acids Bases Reducing agents Oxidizing mineral acids Strong reducing agents Acetic anhydride Chlorinated compounds Metals Caustics (bases)

8. Exposure controls/personal protection

OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available:

Chemical Component	ACGIH TLV-TWA	ACGIH STEL	OSHA PEL
No Data Available			
Appropriate engineering controls:	local exhaust ventilati exposures and mainta must be designed to r 29 CFR 1910. Enginee	ist for the constituents of on or other engineering on ain operator comfort. Engineet the OSHA chemical ring controls must be desited below levels published	controls to minimize gineering controls specific standard in signed to control

	1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits
Individual protection measures, su	ch as personal protective equipment:
Respiratory Protection:	Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required. Respiratory protection may be required in addition to ventilation depending upon conditions of use.
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield
Skin Protection:	Wear protective gloves. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield
Gloves:	No information available
Respiratory Protection:	Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required. Respiratory protection may be required in addition to ventilation depending upon conditions of use.
Other Protective Equipment:	Wear goggles and a Face shield Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and
General Hygiene Conditions:	chemical safety goggles plus a face shield As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material,

11. Toxicological information

Information on the likely routes of exposure (inhalation,	Skin contact, Eye contact
ingestion, skin and eye contact): Symptoms related to the physical, chemical and	No Data Available
toxicological characteristics: Target Organs Potentially Affected by Exposure:	No Data Available
Chemical Interactions That Change Toxicity:	None Known

Delayed and immediate effects and also chronic effects from short- and long-term exposure:

Immediate (Acute) Health Effects by Route of Exposure:

Inhalation Irritation:	Can cause respiratory irritation.			
Skin Contact:	Can cause moderate skin irritation, defatting, and dermatitis. Not likely to cause permanent damage.			
:	No absorption hazard in normal industrial use.			
Eye Contact:	Contact with the eyes may cause moderate to severe eye injury. Eye contact may result in tearing and reddening, but not likely to permanently injure eye tissue. Temporary vision impairment (cloudy or blurred vision) is possible.			
Ingestion Irritation:	Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis.			
Ingestion Toxicity:	Harmful if swallowed.			
Long-Term (Chronic) Health Effe	Long-Term (Chronic) Health Effects:			
Carcinogenicity:	None of the substances have been shown to cause cancer in long term animal studies. Not a carcinogen according to NTP, IARC, or OSHA.			
Reproductive and	No data available to indicate product or any components present at greater than			
Developmental Toxicity:	0.1% may cause birth defects. Possible reproductive hazard.			
Mutagenicity:	No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.			
Inhalation:	Upon prolonged and/or repeated exposure, can cause moderate respiratory irritation, dizziness, weakness, fatigue, nausea and headache. Harmful! Can cause systemic damage upon prolonged and/or repeated exposure (see "Target Organs)			
Skin Contact:	Upon prolonged or repeated contact, can cause moderate skin irritation, defatting, and dermatitis. Not likely to cause permanent damage.			
Skin Absorption:	Upon prolonged or repeated exposure, no hazard in normal industrial use.

2. Hazard(s) identification

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

GHS Hazard Symbols:

GHS Classification:Serious Eye Damage/Eye Irritation Category 1; Skin Corrosion/Irritation Category 2;
Reproductive Toxicity Category 2; Hazardous to the aquatic environment - Acute
Category 2; Hazardous to the aquatic environment - Chronic Category 3; Acute
Toxicity - Oral Category 4GHS Signal Word:Danger
Harmful if swallowed.; Causes skin irritation.; May cause an allergic skin reaction.;
Causes serious eye damage.; Suspected of damaging fertility or the unborn child.;
Toxic to aquatic life...; Harmful to aquatic life with long lasting effects.GHS Precautionary Statements:Obtain special instructions before use. Do not handle until all safety precautions
have been read and understood. Wash thoroughly after handling. Do no eat, drink

	or smoke when using this product. Contaminated work clothing should not be
	allowed out of the workplace. Avoid release to the environment. Wear protective
	gloves/protective clothing/eye protection/face protection.
First Aid Measures:	IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. IF
	ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with
	water for several minutes. Remove contact lenses, if present and easy to do.
	Continue rinsing. IF exposed or concerned: Get medical advice/attention.
	Immediately call a POISON CENTER/doctor/ Rinse mouth. If skin irritation
	occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical
	advice/attention. Take off contaminated clothing and wash before reuse. Wash
	contaminated clothing before reuse.
Storage:	Store locked up.
Disposal:	Dispose of contents/container in accordance with
	local/regional/national/international regulation for hazardous wastes.

4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:

Eye Contact:	Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Get medical attention if irritation develops or persists.
Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.

Most important symptoms/effects, acute and delayed:

Most important symptoms/effects (Acute): Most important symptoms/effects (Delayed):	No Data Available No Data Available
Indication of immediate medical attention and special treatment needed, if necessary:	No additional first aid information available

5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media:

Suitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.	
Unsuitable extinguishing media:	No Data Available	
Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products):		
Flammability Summary:	Combustible at elevated temperatures	
Fire and/or Explosion Hazards:	Material may be ignited if preheated to temperatures above the flash point in the presence of a source of ignition. Combustible Liquid. Can form explosive mixtures at temperatures at or above the flash point.	
DOGE		

Product Name: ROSE Product identifier: FRROS Revision Date: 04-07-2021 Replaces:

Hazardous Combustion Products: Special protective equipment and precautions for fire- fighters:	Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Carbon Oxides, Carbon dioxide, Carbon monoxide Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use methods for the surrounding fire.	
6. Accidental release measures		
Personal precautions, protective equipment, and emergency procedures: Methods and materials for containment and cleaning up:	No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.	
7. Handling and storage		
Precautions for safe handling:	Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.	
Conditions for safe storage, inclu	-

2. Hazard(s) identification

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

GHS Hazard Symbols:

GHS Classification:

GHS Signal Word: GHS Hazard Statements:

GHS Precautionary Statements: Safety Precautions:

Hazardous to the aquatic environment - Acute Category 1; Hazardous to the aquatic environment - Chronic Category 1; Skin Corrosion/Irritation Category 2; Serious Eye Damage/Eye Irritation Category 2A; Reproductive Toxicity Category 2 Warning

Causes skin irritation.; May cause an allergic skin reaction.; Causes serious eye irritation.; Suspected of damaging fertility or the unborn child.; Very toxic to aquatic life.; Very toxic to aquatic life with long lasting effects.

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Contaminated Page 1 of 10

SWEET PEA

	work clothing should not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.
First Aid Measures:	IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention. If skin irritation occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Collect spillage.
Storage:	Store locked up.
Disposal:	Dispose of contents/container in accordance with local/regional/national/international regulation for hazardous wastes.

3. Composition/information on ingredients

Chemical Component:	CAS number and other unique identifiers	% (or range) of ingredient
Cyclopenta[g]-2-benzopyran, 1,3,4,6,7,8-hexahydro-4,6,6,7,8,8- hexamethyl-	1222-05-5	10 - 30
Benzenepropanal, 4-(1,1- dimethylethyl)alphamethyl-	80-54-6	10 - 30
1,6-Octadien-3-ol, 3,7-dimethyl-, 3- acetate	115-95-7	5 - 10
Benzoic acid, 2-hydroxy-, hexyl ester	6259-76-3	3 - 7
1,6-Octadien-3-ol, 3,7-dimethyl-	78-70-6	3 - 7
Heptanal, 2-(phenylmethylene)-	122-40-7	3 - 7
3-Cyclohexene-1-carboxaldehyde, 4- (4-hydroxy-4-methylpentyl)-	31906-04-4	3 - 7
Methylionantheme	1335-46-2	1 - 5

6-Octen-1-ol, 3,7-dimethyl-	106-22-9	1 - 5
1,3-Benzodioxole-5-propanal, .alphamethyl-	1205-17-0	1 - 5
Benzenepropanal, .alphamethyl-4- (1-methylethyl)-	103-95-7	0.5 - 1.5
Cyclohexanepropanoic acid, 2- propen-1-yl ester	2705-87-5	0.1 - 1
2-Buten-1-one, 1-(2,6,6-trimethyl-2- cyclohexen-1-yl)-, (2E)-	24720-09-0	0.1 - 1
3-Cyclohexene-1-carboxaldehyde, 2,4-dimethyl-	68039-49-6	0.1 - 1
2-Nonynoic acid, methyl ester	111-80-8	0.1 - 1
Benzenepropanal, 4-(1,1- dimethylethyl)-	18127-01-0	0.1 - 1

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:

Eye Contact:	Flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention.
Skin Contact:	Wash with soap and water.
Inhalation:	This material does not present a hazard if inhaled. Remove
	individual to fresh air after an airborne exposure if any symptoms
	develop, as a precautionary measure.
Ingestion:	No hazard in normal industrial use. Do not induce vomiting. Seek
	medical attention if symptoms develop. Provide medical care
	provider with this MSDS.
Most important symptoms/effect	s, acute and delayed:
Most important	No Data Available
symptoms/effects (Acute):	
Most important	No Data Available
symptoms/effects (Delayed):	
Indication of immediate medical	No additional first aid information available
attention and special treatment	
needed, if necessary:	
5. Fire-fighting measures	
Suitable (and unsuitable) extingui	ishing media:
Suitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, or dry chemical when
5 5	fighting fires. Water or foam may cause frothing if liquid is burning
	but it still may be a useful extinguishing agent if carefully applied to
	the surface of the fire. Do Not direct a stream of water into the hot
	burning liquid.
Unsuitable extinguishing media:	No Data Available
Specific hazards arising from the o	chemical (e.g., nature of any hazardous combustion products):
Flammability Summary:	Combustible at elevated temperatures
Fire and/or Explosion Hazards:	Material may be ignited only if preheated to temperatures above
-	the high flash point, for example in a fire.
Hazardous Combustion	Carbon Oxides
Products:	

Special protective equipment
and precautions for fire-
fighters:Do not enter fire area without proper protection including self-
contained breathing apparatus and full protective equipment. Use
methods for the surrounding fire.

II. HAZARD(S) IDENTIFICATION

Classification of the cho GHS Hazard Symbols:	emical in accordance with paragraph (d) of §1910.1200;		
GHS Classification:	Skin Corrosion/Irritation Category 2; Serious Eye Damage/Eye Irritation Category 2A; Reproductive Toxicity Category 2; Hazardous to the aquatic environment - Acute Category 2; Hazardous to the aquatic environment - Chronic Category 2; Flammable Liquid Category 4		
GHS Signal Word:	Warning		
GHS Hazard	Cumbustible Liquid; Causes skin irritation.; May cause an allergic skin reaction.; Causes serious eye irritation.; Suspected of damaging fertility or the unborn child.; Toxic to aquatic life; Toxic to aquatic life with long lasting effects.		
GHS Precautions:			
Safety Precautions:	Safety Precautions: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. – No smoking. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.		
First Aid Measures (Response):	IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention. If skin irritation occurs: Get medical advice/attention. If skin irritation or rash occurs: Get medical advice/attention. Take

off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. In case of fire: Use extinguishing media listed in Section 5 of the SDS to extinguish. Collect spillage. Store in a well-ventilated place. Keep cool. Store locked up.

Storage: Disposal:

Dispose of contents/container in accordance with local/regional/national/international regulation for hazardous wastes.

III. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS #	%	
1,6-Octadien-3-ol, 3,7-dimethyl-	78-70-6	7 - 15	
1,6-Octadien-3-ol, 3,7-dimethyl-, 3-acetate	115-95-7	7 - 15	
Benzoic acid, 2-hydroxy-, pentyl ester	2050-08-0	5 - 10	
Benzaldehyde, 3-ethoxy-4-hydroxy-	121-32-4	1 - 5	
7-Octen-2-ol, 2,6-dimethyl-	18479-58-8	1 - 5	
Cyclopenta[g]-2-benzopyran, 1,3,4,6,7,8-hexahydro-4,6,6,7,8,8-	1222-05-5	1 - 5	
hexamethyl-			
Octanal, 7-hydroxy-3,7-dimethyl-	107-75-5	1 - 5	
2-Phenylethanol	60-12-8	1 - 5	
Acetic acid, phenylmethyl ester	140-11-4	1 - 5	
6-Octen-1-ol, 3,7-dimethyl-	106-22-9	0.5 - 1.5	
Cyclohexanemethanol, .alpha.,3,3-trimethyl-, 1-formate	25225-08-5	0.5 - 1.5	
Cyclohexanepropanoic acid, 2-propen-1-yl ester	2705-87-5	0.1 - 1	
Benzene, 1-methoxy-4-methyl-	104-93-8	0.1 - 1	

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret is required.

IV. FIRST-AID MEASURES

Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer
Eyes:	oxygen. Immediately flush eyes with plenty of water for at least 20 minutes retracting
	eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.
Skin Contact:	Wash with soap and water. Get medical attention if irritation develops or persists.
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.
Most important symptoms and effects - acute	No Data Available
Most important symptoms and effects - chronic	No Data Available
Notes to Doctor:	No additional first aid information available

V. FIRE FIGHTING MEASURES

Flammability Summary: Extinguishing Media: Extinguishing Media advised against: Fire and/or Explosion Hazards:	Combustible at elevated temperatures Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. No Data Available Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and	
Fire Fighting Methods and Protection: Hazardous Combustion Products: VI. ACCIDENTAL RELEASE MEASURES	flash back. Do not enter fire area without proper protection including self- contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Flammable component(s) of this material may be lighter than water and burn while floating on the surface. Carbon Oxides, Carbon dioxide, Carbon monoxide	
Personal Precautions and Equipment:	No health affects expected from the clean-up of this material if	
Methods for Clean-up:	contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS No special spill clean-up considerations. Collect and discard in regular trash.	
VII. HANDLING AND STORAGE		
Handling Technical Measures and Precau Storage Technical Measures and Conditio Materials to Avoid/Chemical Incompatibi	 with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Store in a cool dry place. Isolate from incompatible materials. Limit quantity of material stored. Store in a tightly closed container Store in a cool dry place Keep away from heat, sparks, and flame 	

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Measures:No exposure limits exist for the constituents of this product. General room ventilation
might be required to maintain operator comfort under normal conditions of use.
Engineering controls must be designed to meet the OSHA chemical specific standard
in 29 CFR 1910. Engineering controls must be designed to control vapor

YLANG YLANG

Revision Date: 09-11-20

concentrations to below levels published in 29 CFR 1910.1000. Facilities storing or using this material should be equipped with an eyewash and safety shower.

Respiratory Protection:	No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. A supplied air type respiratory will be required.
Eye Protection:	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield
Skin Protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield
Gloves:	No information available
Handling Instructions:	As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.

X. STABILITY AND REACTIVITY

Reactivity: Chemical Stability: Possibility of Hazardous Reactions: Conditions to Avoid:		No Data Available Stable under normal conditions. No Data Available Temperatures above flash point in combination with sparks, open flames, or other sources of ignition. Heat flame sparks Extremes of temperature direct sunlight Direct sources of heat.		
Materials to Avoid/Che	mical Incompatibility:	Contamination Elevated temperatures open flames Strong oxidizing agents Strong bases Strong acids Acids Bases Reducing agents		
Hazardous Decompositi	ion Products:	Carbon Oxides Carbon dioxide Carbon monoxide		
XI. TOXICOLOGICAL INFO	RMATION			
	Skin contact, Eye contact No Data Available			
Chemical Interactions Th	nat Change Toxicity:	None Known		
Immediate (Acute) Health	Effects by Route of Expos	sure:		
Inhalation Irritation:		spiratory irritation.		
Skin Contact:	Can cause m	inor skin irritation.		
Skin Absorption:	No absorptio	on hazard in normal industrial use.		
Eye Contact: Ingestion Irritation:	result in tear Temporary v Irritating to r	Contact with the eyes may cause moderate to severe eye injury. Eye contact may result in tearing and reddening, but not likely to permanently injure eye tissue. Temporary vision impairment (cloudy or blurred vision) is possible. Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis.		
Ingestion Toxicity:	Harmful if sv	vallowed.		
Long-Term (Chronic) H	ealth Effects:			
Carcinogenicity:		substances have been shown to cause cancer in long term animal a carcinogen according to NTP, IARC, or OSHA.		
Reproductive toxicity:		No data available to indicate product or any components present at greater than 0.1% may cause birth defects. Possible reproductive hazard.		
Germ cell mutagenicity	•	No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.		
Inhalation:	Upon prolon	ged and/or repeated exposure, can cause minor respiratory irritation, eakness, fatigue, nausea, and headache.		
Skin Contact:		ged or repeated contact, can cause minor skin irritation, defatting, and		
Skin Absorption:		ged or repeated exposure, no hazard in normal industrial use.		

Component Toxicology Data:

Chemical Name No data available CAS Number LD50/LC50

Has the chemical been classified as a Carcinogen by NTP, IARC or OSHA.
